To Whom It May Concern

Dear Sir / Madam,

Reference for Mr Maurice Ling Han Tong

Maurice is going to complete a 6-month internship programme under my supervision in the BioInformatics Research Centre (BIRC), Nanyang Technological University, Singapore. This internship forms part of Maurice's PhD study which he started in The University of Melbourne, Australia. Maurice's thesis topic is on mining protein-protein interactions from published literature (abstracts).

During his stay in BIRC, Maurice worked independently, producing enough results for 3 manuscripts. He approached his work thoughtfully and logically, paying careful attention to details. His research has been well recorded and documented, which allows his work to be highly traceable.

Maurice has an easy going nature and had gotten along well with all members in the research centre.

As Maurice will complete his PhD in about a year's time, I wish him success and will highly recommend him to any research team he decides to join.

Should you need further clarification, I can be reached via email or phone.

With Regards,

Lin Feng, PhD
Associate Professor, Division of Information Systems
Programme Director, MSc (Digital Media Technology)
